

STAINLESS STEEL ELECTROLYSIS WELD CLEANING LIQUID

- ✓ Safer than traditional method of using Pickle-It-Paste
- ✓ Save labour costs
- ✓ Fast weld clean up
- ✓ Easily washed off and neutralised

CLEAN AND REMOVE SCALE FROM METALIC ITEMS

Cyndan Stainless Steel Electrolysis Weld Cleaning Liquid will save on labour costs by giving a fast and economical weld clean up. No more line hold-ups due to slow and laborious clean up times.

For best results, use it together with SFI'S INOX-3000 ELECTROLYSIS SELF REGULATING POWER (S.R.P.) TECHNOLOGY MACHINE

The Machine and Liquid will not only pay for itself rapidly, it is the easiest method in the welding world for weld clean up jobs.

The Cyndan Stainless Steel Electrolysis Weld Cleaning Liquid is easily washed off and/or neutralised. No more residues of paste left on the metal to continue etching.

No more tricky blobs of paste, left behind to have to try and wash away.

SIZE:

5L, 25L, 60L, 120L, 205L, 1000L

APPLICATION:

- Dip Electrolysis machine brush into product
- Apply to weld in small sweeping action passes 2 or 3 times until weld is clean
- Rinse off
