

# WETTING AGENT

- ✓ Non toxic
- ✓ Soil conditioning solution
- ✓ Dependable application rate
- ✓ Can be diluted at up to 120:1
- ✓ Provides several months residual benefit

## NON IONIC SURFACTANT SOIL CONDITIONER

Cyndan Wetting Agent is a complex blend of synthetic surfactants, designed to increase the beneficial effects of water. **Wetting Agent** is a non ionic surfactant which is comprised of an Ethylene oxide condensate of nonyl phenol. This is not a toxic surfactant.

Due to **Wetting Agent** being non biodegradable it provides for our customer a dependable application rate and residual effect. **Wetting Agent** will provide several months residual benefit.

**Wetting Agent** is ideal for reducing water consumption and breaking the surface tension of soils. It can be used as part of any solution to enhance wetting, spreading and absorption.

**Wetting Agent** enables the water used to penetrate deeper, thus retaining moisture closer to the root system. **Wetting Agent** can be mixed with herbicides, fungicides or fertilisers to increase their beneficial effects.

**Wetting Agent** is dilutable with up to 120 parts of water. This super dilution provides excellent in-use economy.

## SIZE:

1L, 5L, 25L, 205L

## IDEAL FOR:

- Bowling and golf clubs
- Racing circuits
- Parks & Gardens
- Large factory complexes with gardens
- Enhancing weed control activities
