WONDERSOLVE

WATER MIXABLE SOLVENT BASED DEGREASER

UN 1993 HAZCHEM CODE 3Y PACKAGING GROUP III

CYNDAN* WONDERSOLVE combines the power of a petroleum solvent with the economy of water dilution. A result of Cyndan's modern chemical technology brings this new solvent product which through the ethoxylate clinging action provides greater retention time thus producing outstanding degreasing results. Dissolves tar, grease, road film, asphalt, soils and waxes. Ideal for heavy vehicles and road working equipment.

DIRECTIONS:

Do not swallow. For the most economical results CYNDAN* WONDERSOLVE should be mixed with four parts water. Adding the water to the concentrate is preferred, but is not necessary. While mixing the solution of CYNDAN* WONDERSOLVE agitation is helpful to provide a uniform mixture, as the product will thicken. The diluted product may now be applied to the surface to be cleaned by spray, mop or brush methods or may be applied effectively through the Spray Doc Compressed Air Sprayer (please consult your Cyndan Distributor for a demonstration). Allow the mixture to penetrate the surface to be cleaned for 5 to 10 minutes. Rinse off with tap pressure, or high pressure water jet. On stubborn stains agitation may be necessary.

CYNDAN* WONDERSOLVE can be broken down with other solvents such as kerosene or diesel. However, the thickening action is lost and the true economy of water dilution is not achieved.

SAFETY: Avoid contact with eyes.

FIRST AID: If swallowed, do NOT induce vomiting, give a glass of water and seek medical attention. Contact the Poisons Information Centre (13 11 26 Australia; 0800 764 766 New Zealand). If in eyes, hold eyelids open and flush with water for at least 15 minutes.
